Awtokism and Neopositivism

In this article, I am going to talk about a theme that majority of you mythicals have never heard about, or actually know a little about it. We need to talk about our enemies on this planet, more specifically, two enemies, awtokists (antimythicals) and neopositivists. It is probably a theme majority of you will not like talk about it, but it is necessary for we have notion about how our two main enemies actually work on this planet.

I will start with the neopositivists, that are actually simpler and less negative energy than the awtokists. Neopositivism came from positivism, which is a movement that is about focus on study the material things and find rational explanations for everything, forgetting about the extraphysical and spiritual things. Neopositivism is basically positivism, but in an advanced state, focusing on combat and deny everything reality to extraphysics, spirituality and even supernatural things.

You probably have heard someone saying "you support pseudoscience", "it is pseudoscience", "the things you say are nonsense" and other things, first of all, the term "pseudoscience" is consequence of the neopositivism, for them, for something be a "science" it must be accepted by the scientific "positivist" method and being able to be proved as "false", sounds really contradictory, showing how contradictory human science actually is.

With that, that is the why we needed to create the term "extrascience" and "parascience", for show that what we believe are not pseudoscience as they say and we can have our own methods for study those things. We need to remember that they made it for limit human consciousness; they actually put consciousness things on the same bag as simple ideas that actually are really nonsense (until for us, of course). Showing that how neopositivism is perverse on trying to block human consciousness.

And also, we cannot forget that human science changed with the time, when a method does not work for several things, it started to be questioned and trying to create a new one, it is a thing that probably majority of the neopositivists have forget. Mainly the (neo)atheists, (neo)atheists can also be considered as our enemies, since they actually do not reject deities, but they also reject starseeds and anything that is mythical and supernatural, that is the why we mythicals, starseeds and other kind of supernaturals must counter neopositivism and (neo)atheism.

Now, I will talk about a theme, that probably majority of you guys will not like, but, the ones who have read this article until here, will probably like. It is about awtokism, awtokism came from AWTOK (Always Watching The OtherKind) that is a hypothetical organization that is about hunting mythicals, starseeds, supernaturals and otherkind in general, but awtok started to be used as a world for refer to antimythicals in general.

Awtokism is the union of anti-mythicalism (anti-mythical sentiment, actions, discrimination, and persecution to mythicals) with neoliberalism and capitalism. We can see awtokism happening on media, culture... Mainly on videogames, probably you guys have asked to yourselves who do we have a lot of movies and videogames focused on attack mythicals, mainly divine mythicals and starseeds, as if they were the biggest enemies of humans. But the answer of it is simple.

Awtokism is made for encourage humans to fear, discriminate and persecute mythicals and attack mythicals, awtokism works in the same way as we see on history, anti-Semitic and xenophobic propaganda on the past. It is the same for us, we are passing for it nowadays, and the mythicals who protect them and deny it is happening, or they are ignorant or they actually agree with them or they actually are how the awtokists them they are or all three things.

Probably you guys are asking, "how can we counter it?" and I tell that we should not despair neither get into fear. For we counter them, in the same way as we counter the neopositivists, we need to be creative. Creating our own media, culture, videogames, movies and even content favorable to mythicals and creating ways to denounce awtokism publically are an option we have. Uniting ourselves even more and creating theories and planning how highly evolved Earth would look like, like monteirism, evolvianism, extraphysicism and other examples, can help too.

So, it is not a hard thing for we do, we can fight both, neopositivists and awtokists easily. We just need motivation and organization for do so, and remember the mission we have in this planet and help humans to evolve.
